

SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8804

SESSION NUMBER: 2

DATE OF SESSION: 6 SEP 88

DATE OF REPORT:

START: 1405

END: 1450

METHODOLOGY: CRV

VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: DETERMINE THE PURPOSE/FUNCTION OF THE TARGET
[REDACTED] LOCATED AT COORDINATE 557803/870630.

2. (S/NF/SK) VIEWER TASKING: DESCRIBE FURTHER THE CONCEPT OF "LARGE
AMOUNT OF ENERGY" FROM PREVIOUS SESSION

3. (S/NF/SK) COMMENTS:

4. (S/NF/SK) EVALUATION: THE TARGET APPEARS TO BE UNDER CONSTRUCTION,
MASSIVE AMOUNTS OF ELECTRICAL ENERGY ARE GATHERED TOGETHER/BUILT UP TO
HIGH LEVELS. THE ENERGY IS CONTAINED IN "PACKETS" THE CONCEPTS OF
STORAGE, CONTAINMENT AND RELEASE OF THIS ENERGY ARE IMPORTANT TO THE
TARGET.

HANDLE VIA SKEET CHANNELS ONLY

SECRET/NOFORN

CLASSIFIED BY: DIA (DT)
DECLASSIFY: OADR

Session Summary
Viewer 095
6 September 1988
Start: 1405
End: 1450

The target of interest is under construction not yet completed, this is an idea that has come through in all previous sessions through tense but may not have been clearly objectified as such.

The concept of large amounts of energy is integral to the purpose of the structure. This energy is electrical and involves a massive amount of contained charge. (ADL: plasma, marx bank, inductive energy stores). It is of high voltage and voltage, not current, is what is important. The energy comes into the building at low levels: it is in the building that it is gathered together/ built up to high levels. The energy in the building is not linear ie. a flowing current, but is instead a volume/region of charge. The energy is in "packets". Main concepts associated with the concept of energy as it relates to the intelligence problem at hand are storage, containment and release. The energy is released all at once.
